Innings Runs / Hits (with tally)      Total Runs / Hits

Example note: at the start of inning 1 Turner singled and was brought home by the player at batting order 2, Schwarber, who homered.

Also note I use 2 layers. The main layer has the player names, team names, date and venue and the second layer has all the scores so it's easy to copy the page then delete all the scores but keep the names!

Example note: for pitching changes I note the batting order number at the top, add a little mark and note the new pitcher name in the space at the bottom.

Any mistakes in the actual scoring of this real game are down to me scoring this in the pub! Heh!
